

DRHBC calculation result for odd-Z nuclei with Z=67 and 69

The 7th workshop on nuclear mass table with
DRHBC theory

Jinniu Hu, Jinzhe Zhang, Lianjian Zou

Nankai University

2 July, 2024

Table of Contents

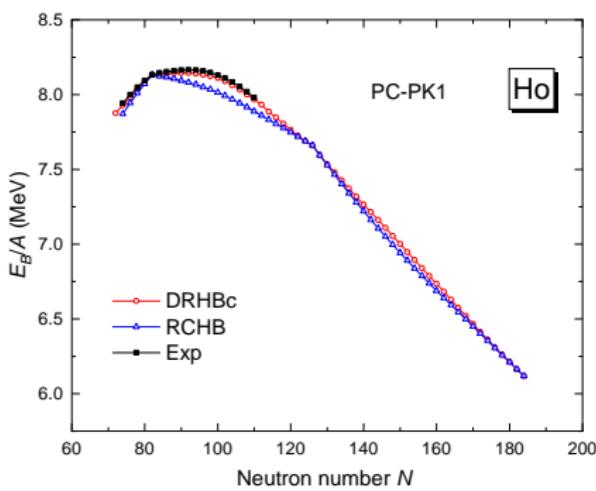

- 1 Current progress
- 2 Results
- 3 Summary and Future plan

Current progress (odd-Z nuclei)

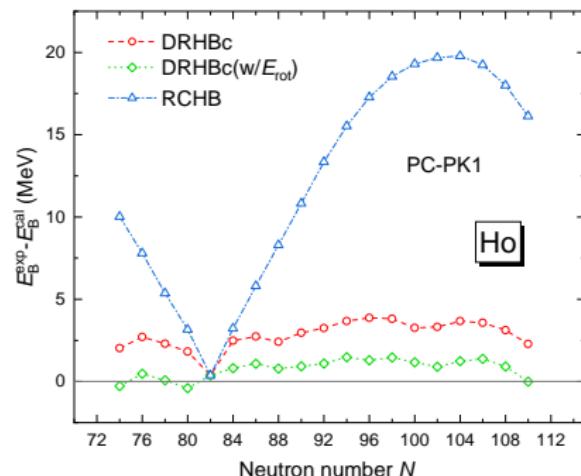

- Odd-even nuclei
 - Ho(Z=67): All isotopes are done
 - Tm(Z=69): All unconstrained calculations are done, constrained calculation not yet started
- Odd-odd nuclei
 - not yet started

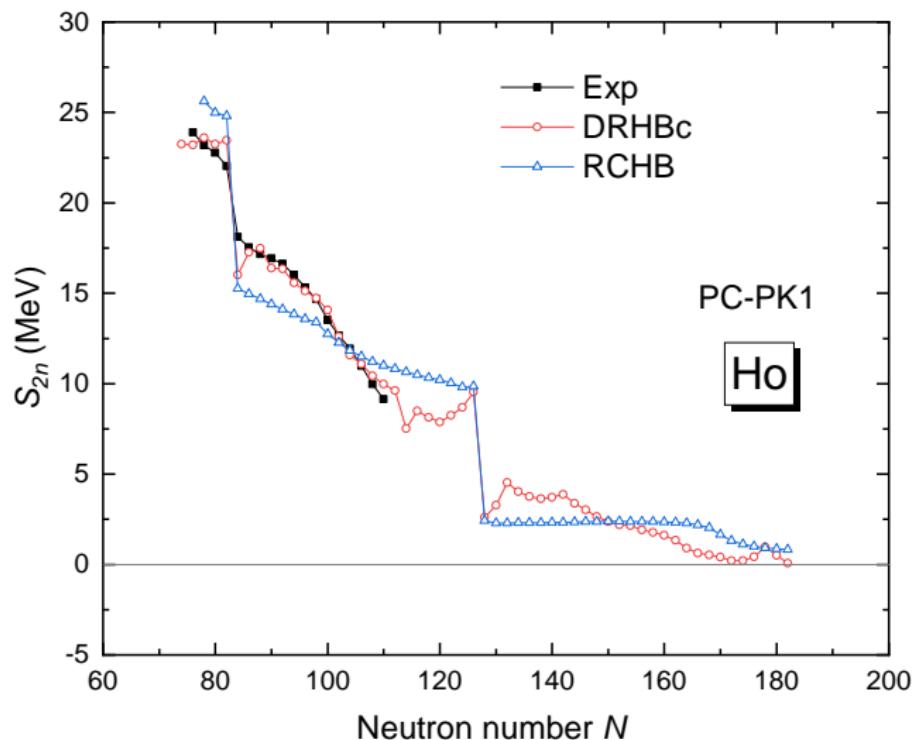

Ground state energy: Ho ($Z = 67$)

Binding energy per nucleon for Ho ($Z = 67$)

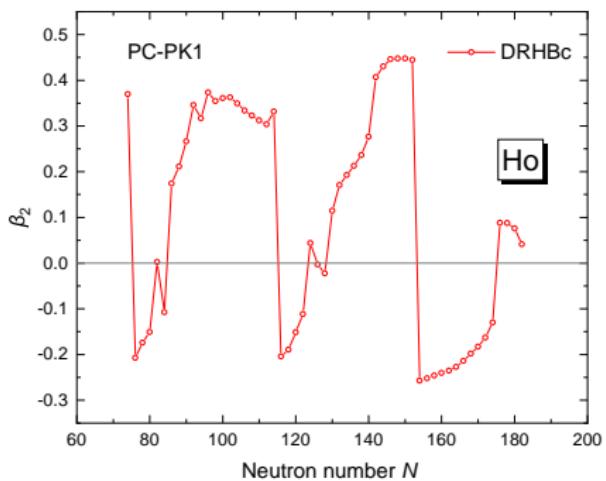

Difference between the experimental energy and DRHBc calculations for Ho($Z = 67$)

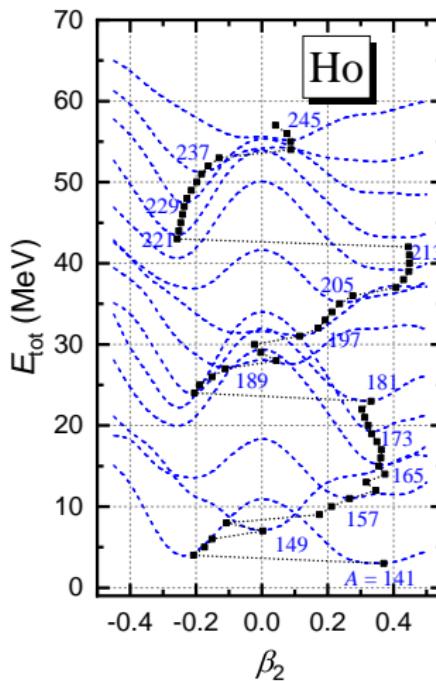

2-neutron Separation Energy: Ho ($Z = 67$)

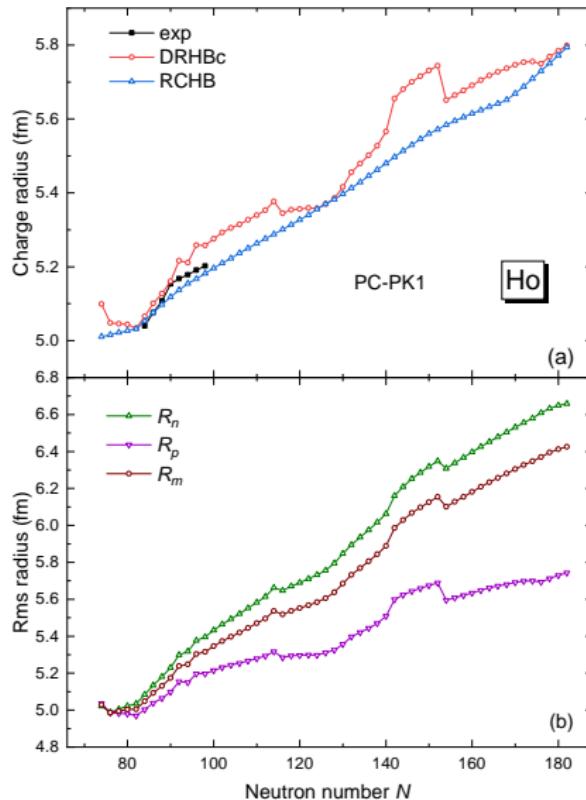

Deformation β_2 and potential energy curve: Ho

Deformation for Ho ($Z = 67$)

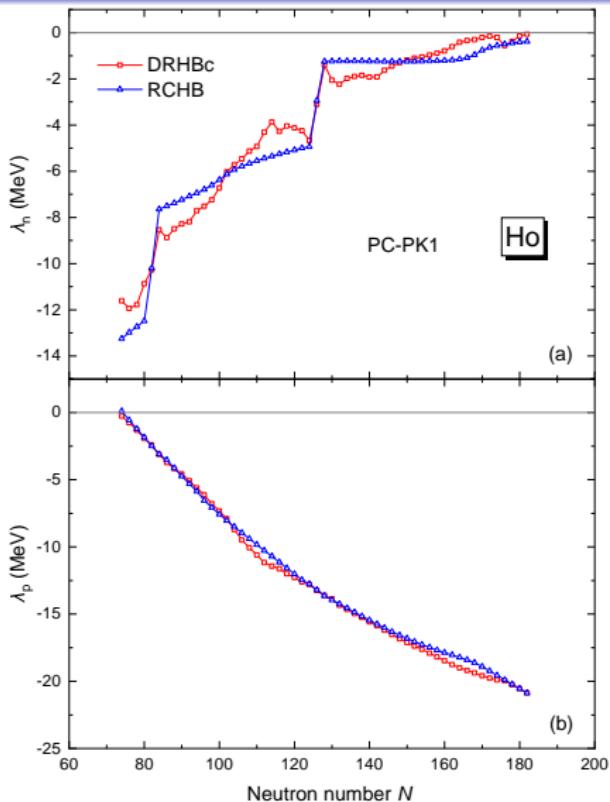

Evolution of potential energy

Radius: Ho ($Z = 67$)

Neutron and Proton Fermi Energy: Ho

Summary and Future plan

- Calculations completed
 - Ho(Z=67): All odd-even isotopes
 - Tm(Z=69): All odd-even isotopes (unconstrained calculation)
- Future calculations
 - Ho(Z=67): Odd-odd isotopes
 - Tm(Z=69): Odd-even isotopes (constrained calculation)
 - Tm(Z=69): All odd-odd isotopes
